

## Salting Advice from WSCC

WSCC recommends a spread rate of approximately 20 grams of salt / grit per metres square when hand salting. Although salt / grit can be spread effectively with shovels, care is required to ensure over salting does not occur.

20 grams is in fact a very small amount. You don't need a lot of salt to protect a footway. Use it sparingly. Over salting is damaging to the environment and a waste of a limited resource.

The white board in the above photo is one metre square and has 20 grams of salt / grit spread across it. You will observe that you do not need a lot of salt to protect the footways. Spread it evenly and your salt will last longer and cover a greater area.
